Encircle Hydro Cheat Sheet: Moisture Workflow (iPad)

Full Hydro workflow in order; *crew 1.x* tags = Crew Procedures v0 steps (procedures/crew_procedures_v0.md). Current Encircle Hydro only. Screens: Encircle help center, checked Oct 19, 2026. On the newest app the meter button may read **Take Meter Photo**. **[verify in app]** = check in the app.

1. Getting in

Open Hydro

- **Claim** > **Hydro** > **Tasks** tile
- Day 1: **Start Here** (Job Setup). Later: **Visit #**
- Offline job? **Claim** > ☰ > **Download Data** first

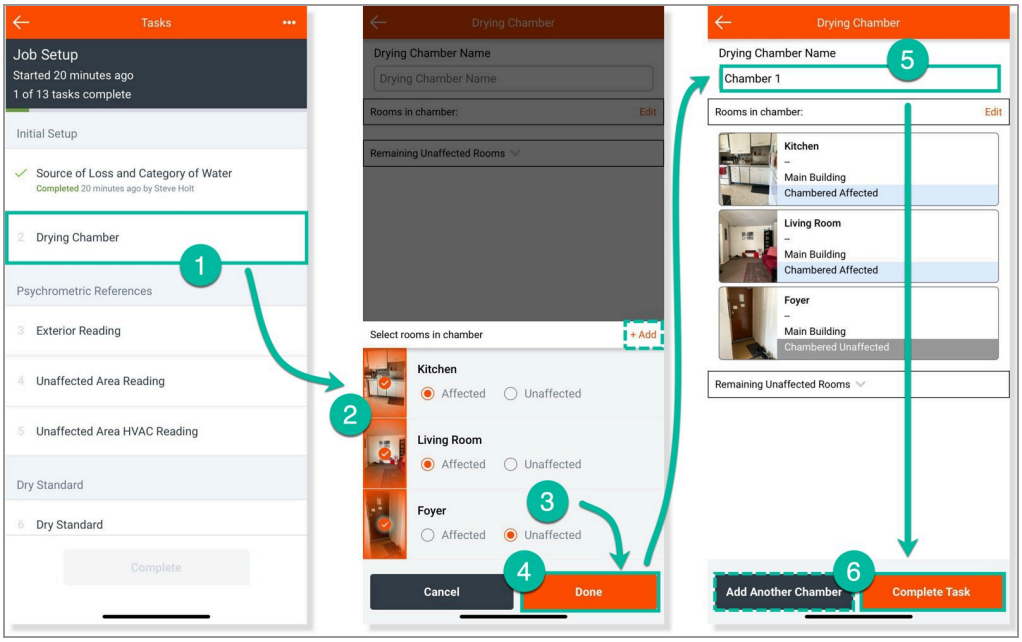

Hydro > Tasks > Start Here

2. Drying Chamber (do this first) · crew 1.1

Set up the chamber

- **Drying Chamber** > pick rooms > mark **Affected/Unaffected** > **Done** > name > **Complete Task**
- More areas: **Add Another Chamber**
- Each chamber then gets its own reading, point and dehu tasks
- **Chamber first. It unlocks Affected Area and dehu tasks.**

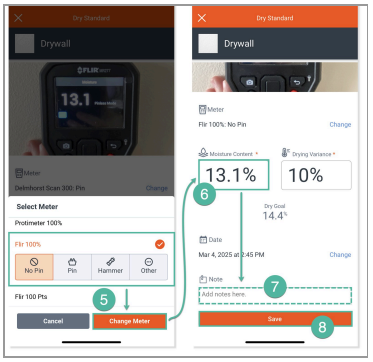

Drying Chamber setup

3. Dry Standards · crew 1.1

One per wet material

- **Dry Standard** > material > Meter **Change** > **Change Meter** > **Add Meter Photo** > check MC > **Save**
- Read it on the same material in a dry area
- **Drying Variance** defaults to 10% = your **Drying Goal**
- Next material: red **+** on the Dry Standard list
- Not listed? **+ Add** on the material list **[verify in app]**

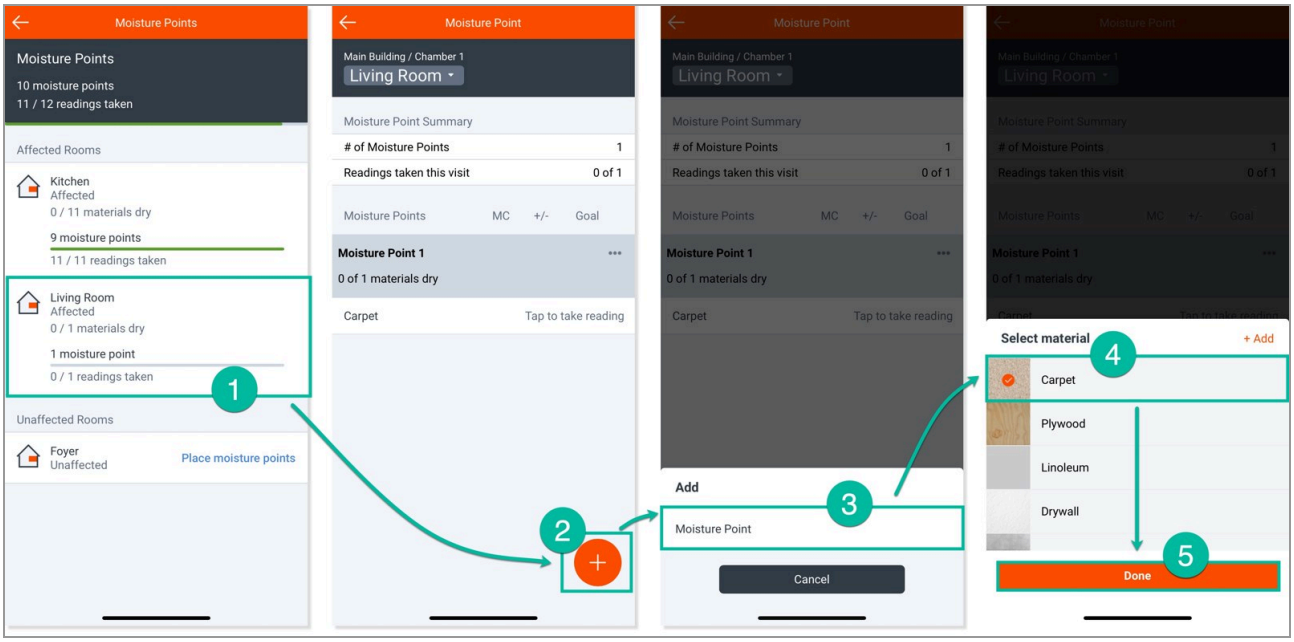

Change Meter > meter photo

4. Moisture points (no map) · crew 1.1

First point in a room

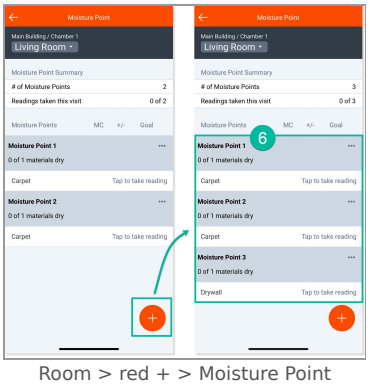

- **Moisture Points** > **Place Moisture Points** (in the room) > material > **Done**
- **One point per affected material, per room. No map placement.**

Place Moisture Points

More points

- Open the room > red **+** > **Moisture Point** > material > **Done**
- New wet material later? Lead adds a point

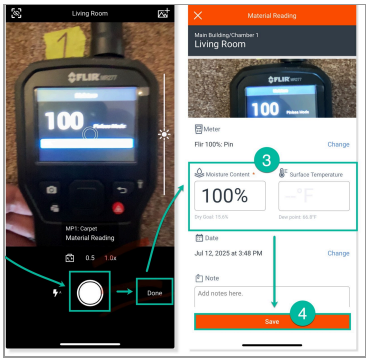

Room > red + > Moisture Point

5. Daily readings · crew 1.2, 1.3

Read each material

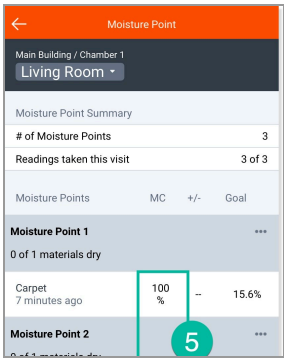

- **Moisture Content Readings** > room > **Tap to take reading** > **Add Meter Photo** > check MC (auto-filled) > **Save**
- **That material's wettest spot today. It can move.**
- Meter shot: screen and material in frame

Tap to take reading > meter photo

Drying goal / dry status

- List shows MC vs **Goal** and "x of y materials dry"
- Dry = at or below the Drying Goal

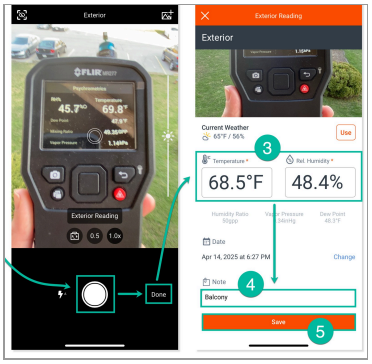

MC vs Goal, materials dry

6. Air readings, every visit · crew 1.2

Outside and unaffected

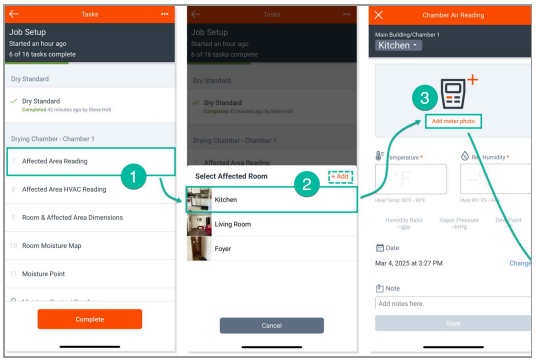

- **Exterior Reading** > **Add Meter Photo** > Temp + RH > **Save** (or use local weather)
- **Unaffected Area Reading** > room > **Add Meter Photo** > Temp + RH > **Save**

Exterior Reading

Affected, each chamber

- **Affected Area Reading** > room > **Add Meter Photo** > Temp + RH > **Save**
- High humidity alert on day 1 is expected

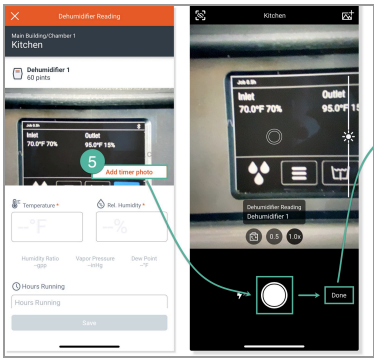

Affected Area Reading

7. Dehu readings · crew 1.6

Each dehu, every visit

- **Dehumidifier Readings** > room > tap dehu > **Add Meter Photo** (exhaust) + **Add Timer Photo** (hour meter) > Temp, RH, **Hours Running** > **Save**
- Unit was off? Say so in **Notes**. Next room: room selector at top
- Placing new units: **Equipment Placement** > red **+** > room > **+** per type > **Place** **[verify in app]**

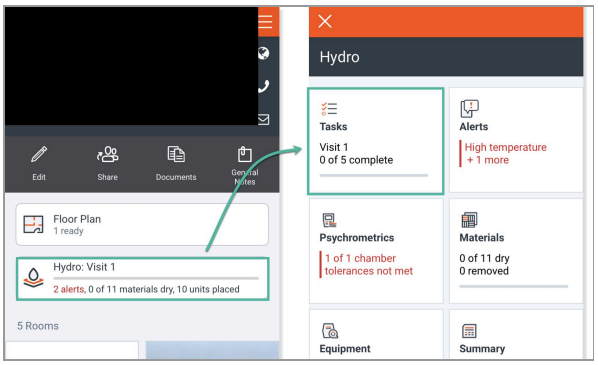

Meter + timer photo

8. Subsequent visits

Visit 1, 2, 3…

- **Hydro** > **Tasks** (**Visit #**) > work through required tasks
- Fix a past visit: **Tasks** > **···** > **Change Visit**

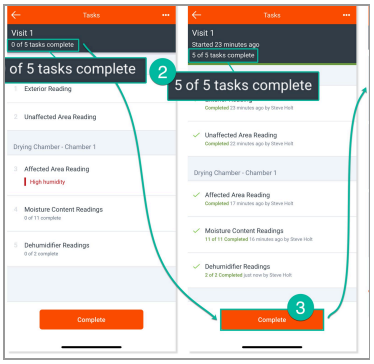

Hydro on Visit 1

9. Complete

Close the visit

- Task list > **Complete**, every visit
- Then sync: app open until the **Network** icon shows no number
- Drying done: **Equipment** > **···** > **Remove All Equipment** > **Yes**

Task list > Complete

10. Hydro reports (PM/lead)

Generate

- **Claim** > **Documents** > **Generate Report** > **PDF Report** > report type > **Generate Report** **[verify in app]** (mobile labels)
- **Full**: all readings, photos, notes. **Summary**: first/last two readings, no photos. **Equipment**: equipment only. **Carrier**: carrier format, maps, photos, full dry log.
